SCHOOL SPORT AUSTRALIA
HYDRATION GUIDELINES

DRINK WATER - DRINK FLUIDS - DRINK WATER - DRINK FLUIDS

Introduction

School Sport Australia programs provide both sporting and educational opportunities for students. The purpose of these guidelines is to ensure that students become aware of the benefits of proper hydration practices before, during and after physical activity.

It is essential therefore that all team management at School Sport Australia events ensure that students are not placed at risk and are properly hydrated before participating in physical activity.

Key Messages

The following messages should be used to help convey the benefits of proper hydration.

- THIRST IS A POOR INDICATOR OF FLUID NEED
- HYDRATE BEFORE, DURING AND AFTER PLAY

Suggested Procedures

The following procedures are suggested for all School Sport Australia events:

- Host organizations should ensure that water is available at all venues at all times and if necessary, water carriers should be provided during matches. Other fluids which may be used include diluted sports drinks, diluted cordial and diluted fruit juices. Carbonated drinks should not be used.

- The procedures to be followed for providing fluid to students during competition should be clearly identified at the pre-event meeting.

- Sports which do not have appropriate scheduled re-hydration strategies (e.g., drinks breaks) should implement strategies for allowing fluid to be provided to participants during matches.

- Scheduled breaks in matches should be used to actively promote the benefits of hydration to participants.

- Where possible, team management should actively promote the use of interchange rules as a tool to prevent dehydration.

- Participating teams may designate their own water carriers. These may be adults but cannot be the team coach.

- No water carrier is to engage in the coaching of individuals or the team whilst on the field of play.

- School Sport Australia member bodies should ensure that all their teams are provided with individual water bottles for every event. During matches, these should be located immediately next to the playing area to enable players to help themselves (at appropriate times) during matches.
1. **INTRODUCTION**

   i) It is well known that Australia has the highest incidence of skin cancer in the world.

   ii) Levels of ultraviolet radiation are particularly high in many locations around Australia.

   iii) Many sporting events organised by School Sport Australia and its member bodies are conducted outdoors and in locations which have been identified as high skin cancer risk areas, particularly at certain times of the day.

   iv) It is, therefore, incumbent on School Sport Australia and its member bodies to protect students and staff, to the greatest extent possible, from the dangers of exposure to the sun.

2. **AIMS** - The aims of this policy are to promote:

   i) An awareness of the dangers of exposure to the sun and the need for protective measures.

   ii) The need for positive attitudes and responsible behaviours towards skin protection.

   iii) Practices which can reduce the incidence of skin cancer.

3. **IMPLEMENTATION STRATEGIES**

   In order to ensure that all participants at School Sport Australia events are afforded the best possible protection from skin damage caused by the sun, the following implementation strategies are recommended:

   i) State associations should ensure that team uniforms are suitable for the locations to be visited and that hats are included when travelling to high sun risk venues.

   ii) State associations, where possible, should schedule matches outside the identified high risk times.

   iii) State associations, where possible, should ensure that adequate shade areas are provided at competition venues.

   iv) State associations should ensure that team officials provide team members with adequate instruction on sun sense and protection measures.

   v) State associations should ensure that team officials provide modelling behaviours which are appropriate for protection from the sun.

   vi) State associations should ensure that team officials encourage personal protection measures for students at all times, including:

       - Encouraging the wearing of hats when in the sun
       - Encouraging the use of broad spectrum sunscreen
       - Encouraging the use of available shade areas whenever possible

   The above are protective measures which School Sport Australia encourages all participants to embrace so as to ensure that appropriate precautions are taken when exposed to the sun.

4. **HEAT STRESS**

   Heat stress can also affect sporting performance.

   It is recommended that state associations ensure that their team officials are familiar with Sports Medicine Australia’s Heat Stress and Exercise Guidelines.

   Copies of these are available from School Sport Australia on request.
